still more improvement.

Late this afternoon, when Dr. Shrady arrived the General had returned to his writing-pad in order to save his voice and see if he could not use it again to morrow. He was in good spirits at evening and the pros-pects for a respectful night seemed good. In summing up the four weeks that the Gen-eral has been here, Dr. Douglas says that in his ability to rest, in appetite and voice, he has greatly improved. The neck swelling has gone down, the throat has become clearer, and the pulse has recovered normal fre-quency. The cancer has still progressed while the improvement that has now set in will not be turned by anything within the power of the physicians to prevent, they do not expect it will last.

THE PROPOSED RAILROAD.

Surveyors at Work on a Line from Coopersville to Muskegon.

The Coopersville Geserver says: "On Tuesday last a party of Grand Trunk surveyors from Canada arrived at this place and stuck their first stake at the depot and ran west along the present line of the D. G. H. & M. road to the switch at the end of the station grounds where they left the main line and started in a northerly direction for Muskegon, to the great surprise of farmers along the Aldermen Grady, DeGraaf and Creque were absent when Mayor Curtiss called orto the great surprise of farmers along the line of survey and of everybody size in this vicinity, for, though the observer has for a long time contended that a line of read would some day pass through this village reaching Muskegon, and the people of this vicinity have regarded such a road as a mere question of time, yel it was fittle expected that the Great frunk people or the D. G. H. & M. G. would do so, as they had never made any talk about it or any move in that direction, or shown any inclination to put in such a branch, and the first intimation the people have had of any first intimation the people have had of any such intention was the actual beginning of

the survey on Tuesday last.

Though the railroad company have made no move about this proposed new branch to their road, they have evidently thoroughly informed themselves as to the best their road, they have evidently thoroughly informed themselves as to the best and most feasible route for their branches. The surveyors have with them an accurately and correspully prepared preliminary profile of the intended survey, which passes to a point about two miles west of Havenna village and there runs directly to Muskegan. Mr. Couklin and Mr. Walter, who have seen the profile, and who are well acquainted with the country through which the survey will pass, say that a better line could not be selected, as it will avoid all swamp, marches selected, as it will avoid all ewamp, marshes and hills on the line, and that the section of country through which it passes is nearly a dead level and will require but little expense in grading, in fact is practically graded already."

If old Pollonius were to enter our story and see the low prices at which we are seling our fine Mackinaw Hats, he would utter the above words with more force and empliasis than he ever did in his life. We also have a fine assortment of Manillas, which we are closing out, at cost, THOMAS & CRIPPER
